Subject: Re: Organophosphate SAP

Thank you for the update. Hartz Mountain is a member of the industry task force which has been formed to look at pet exposures. Our first submission was made recently. Does the Agency need a authorization advising EPA we are a member of the task force so that this data is used in the rabon evaluations?

Anna, Joe:

The EPA's Office of Pesticide Programs (OPP) plans to convene a FIFRA Scientific Advisory Panel (SAP) for the review of activities that could inform human health risk assessment for organophosphate pesticides. The agency plans to use these data to determine chemical-specific uncertainty factors for OP chemicals. More information on the SAP may be found here: <https://www.epa.gov/pesticides/epa-hold-scientific-advisory-panel-organophosphates-september>.

The SAP is not expected to alter the registration review timeline for tetrachlorvinphos (TCVP). If you have any questions, please feel free to contact me.

Regards,

Trish
